Any even number can be written as the sum of two equal addends.

$6 = 3 + 3$ $4 = 2 + 2$

Practice

Write the equal addends that make each sum.

1. $10 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

2. $2 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

3. $18 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

4. $8 = \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

Find the missing number.

5. $7 + \underline{\hspace{1cm}} = 14$

6. $\underline{\hspace{1cm}} + 3 = 6$

7. $8 + \underline{\hspace{1cm}} = 16$

8. $\underline{\hspace{1cm}} + 6 = 12$

Find the missing addends.

9. $5 + \underline{\hspace{1.5cm}} = 10$

10. $\underline{\hspace{1.5cm}} + 2 = 4$

11. Maria and Steve each have 8 toys for the toy drive. How many toys do they have in all?

I couldn't eat another thing. I'm stuffed!

$\underline{\hspace{2cm}}$ toys

12. Mrs. Miller's class has 18 students. There are an equal number of boys and girls in the class. Write a number sentence to show how many boys and how many girls are in the class.

$$\underline{\hspace{1.5cm}} = \underline{\hspace{1.5cm}} + \underline{\hspace{1.5cm}}$$

Test Practice

13. Kylie buys 7 bananas. Her mom also buys 7 bananas. How many bananas do they buy in all?

0	7	10	14
○	○	○	○ .
