

Name: _____

Math Chapter 3 review

1) Niu Niu has \$16 in his pocket and \$19 in his notebook.

Part A: Show addition of \$16 and \$19 by aligning vertically. (2 points)

Part B: Niu Niu decided to take the \$16 apart to make it easier to add. Explain how he can do this to make adding easier. (4 points)

2) You need to add several numbers: $42 + 27 + 11 + 14$. Write all the ones digits. What will be the ones digit in the final answer? (3 points)

- 3 Emily the otter was doing work on a recent addition test. His work is shown. What is his error? Find the correct total. (3 points)

$$\begin{array}{r} 38 \\ + 16 \\ \hline 44 \end{array}$$

- 4) A frog started 8 inches away from her home. Then, using several jumps, she went another 43 feet from home. If she only jumps 1 inch or 10 inches at a time, and wants to make as many long jumps as possible, show the frog's path on the number line. Circle the frog's final location. (3 points)

- 5) While playing a game of darts, Lyla was hoping for a total score of 100 exactly. Use a line to match the numbers on the left with the numbers on the right so that you the two numbers make 100.
