

My Homework

Lesson 6**Problem Solving:
Make a Table**

Each hen lays the same number of eggs.
1 hen lays 3 eggs. Two hens lay 6 eggs.
Three hens lay 9 eggs. How many eggs will
6 hens lay?

1 Understand Underline what you know.
Circle what you need to find.

2 Plan How will I solve the problem?

3 Solve I will make a table.
Each hen lays 3 eggs.
So, 6 hens will lay
18 eggs.

Hens	Eggs
1	3
2	6
3	9
4	12
5	15
6	18

4 Check Is my answer reasonable?

Problem Solving

Underline what you know. Circle what you need to find.

1. Four turtles fit in one tank. Jose has 3 tanks.
How many turtles can he have?

_____ turtles

2. Nine children want to feed the birds. They each have 2 bags of seed. How many bags of seed are there in all?

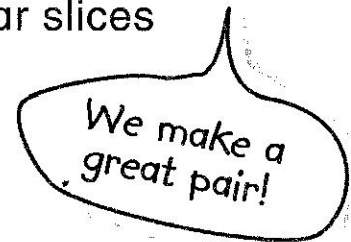

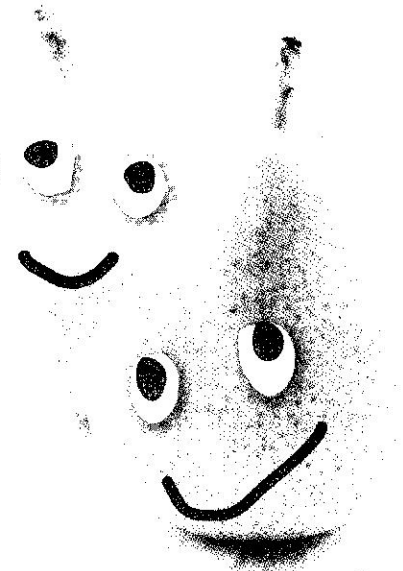

_____ bags

3. Shandra is giving a snack bag to each of her 4 friends. She puts 4 pear slices in each bag. How many pear slices are there in all?

_____ pear slices

4. Eight children are making snowmen. Each snowman needs 3 snowballs. How many snowballs do the children need in all?

_____ snowballs
